

Grizzly Bear Research Needs YOUR input!

Grizzly bears and trail users share much of the same space in Alberta. Sarah Elmeligi, PhD Candidate is currently researching grizzly bear use of habitat adjacent to trails and trail users' perspective on management options.

YOUR input is required to make this research stronger and more relevant to grizzly bear management in our recreational playgrounds.

FOCUS GROUPS are being held to share preliminary results and get feedback from trail users. If you have hiked or biked on a trail in Banff National Park in the summer of 2013, and are interested in grizzly bear issues, **YOU'RE INVITED.**

Max 15 people per focus group, so please email to reserve your spot.
